EXPEDITED PROCEDURE - EXAMINING GROUP 1645

S/N 09/077,572

IN THE UNITED STATES RATENTAND TRADEMARK OFFICE

Applicant:

Michael A. Apicella et al.

Serial No.:

09/077,572

Filed:

Title:

TAN 1 1 SOUS October 13, 1998 NON-TOXIC MUTANTS OF BATH

Examiner: S. Devi

Group Art Unit: 1645

Docket: 875.001US2

GENIC GRAM-NEGATIVE BACTERIA

AMENDMENT & RESPONSE UNDER 37 C.F.R. § 1.116

Box AF Commissioner for Patents Washington, D.C. 20231

In response to the final Office Action mailed February 21, 2001, Applicant respectfully requests that the Examiner consider and enter the following amendments and remarks in connection with the above-identified patent application.

This response id accompanied by an Appeal Brief.

IN THE SPECIFICATION

Please delete the paragraph beginning on page 13 at line 27 and ending on page 14 at line 7, and insert the following paragraph therefor:

--Two plasmids, termed pB28 and pB29, each with a mini-Tn3 transposon containing the chloramphenicol acetyltransferase (CAT) gene inserted into the htrB open reading frame at a different location. Nontypeable Haemophilus influenza strains 2019 B28 and 2019 B29 were deposited on November 14, 2000 with the American Type Culture Collection, 10801 University Blvd., Manassas, VA 20110-2209 under the provisions of the Budapest Treaty, and all restrictions will be irrevocably removed upon the granting of a patent on this application. Strain B28 has been accorded accession number PTA-2667 and strain B29 has been accorded accession number PTA-2668. Each plasmid was used to transform nontypeable H. influenzae strain 2019 and bacterial cell transformants were selected for by growth in the presence of chloramphenicol (1.5 µg/ml), resulting in identification of mutant strains designated NTHi B28 and B29, respectively. Locations of the mTn3 insertion in the chromosomes of the NTHi mutants were confirmed by genomic Southern hybridization using the 2.4 kb Bg/III fragment as a probe. In particular, a Bg/III digest of NTHi strain 2019 DNA resulted in a 2.4 kb fragment; whereas
